Vericut

Vericut Verification

2 Days Training Course

DAY 1 - SETUP SIMULATION

On Day 1 you will learn how to build and prepare a Vericut project for simulation. The day begins with an introduction to Vericut and the project setup workflow, then covers CAD/CAM interfaces, importing models, and loading NC programs, Hands-on exercises focus on setting work offsets and defining cutting tools so the project is ready to simulate.

DAY 2 - PROCESS NC PROGRAMS AND INSPECT CUT STOCK

Day 2 Part 1 session focuses on running and evaluating the NC program simulation. You will learn how to monitor Vericut simulation, find and detect errors, and inspect the cut stock throughout the machining process. You will also use AUTODIFF to compare the simulated cut stock to the design model and identify differences between the simulation and the intended part.

SHOP DOCUMENTATION

Day 2 Part 2 session expands into shop documentation and review. You will learn how to generate Process Reports and create Review Files for Vericut Reviewer to communicate simulation results to the shop floor.

PREREQUISITES FOR WEB TRAINING

• Must have the latest version of Vericut running on your computer prior to class. Licensing concerns can be addressed by emailing support.seao@cgtech.com. • Computer must be set up to support voice over IP. There will be no “Phone-in” option available for the training. • All users must use headphones or earbuds for listening in. Open speakers can cause feedback problems when microphones are enabled. • Two monitors are required. Computer display should be configured to extend applications to either monitor (not duplicated).

PRICING:

US$1000 per class per attendee

Training courses are held online via Teams. On-site customer training is also available at US$1,950/day plus travel expenses.

CLASS TIME:

9am - 5pm per day (SGT)

Classes typically commence between these hours online.

Cancellation Policy:

48 Hours before scheduled training

If you can no longer attend, please notify Vericut at least 48 hours before your scheduled training course is due to commence to avoid being charged the full training fee. All training must be completed within 12 months of purchase.
