

# Installing your new ICAM licenses

## ICAM V24 and Later

### Method 1

- 1. Copy the license content between the Start of the keyfile Content until the End of the keyfile Content from the email.
- 2. On the server computer, open Windows Explorer (File explorer) and browse to the license file location. C:\ProgramData\ICAM\Server\
- 3. Open a file named "icamls.key" in a text editor. If the file is not present, create a new text file and rename it to "icamls.key".
- 4. Edit the file with notepad and paste the license content inside.
- 5. Save the file and the server will read it automatically.

#### Method 2

- 1. Copy the license content between the Start of the keyfile Content until the End of the keyfile Content from the email.
- 2. Launch Windows notepad.

- 3. Paste the license content and save the text file on your desktop.
- 4. On the computer serving the licenses, launch the ICAM license manager from the start à all apps ...

	ICAM License Server V25 x64
ID	ICAMID Utility
<b></b>	Install.html
Ŷ	License Manager (SERVER)

5. Click on top menu "Setup" > "Update Key File..."

	- D	3	
(SERVE	R) 127.0.0	.1:6670

*** No licen	S	erver Port	
	S	erver Log Settings	
	с	hange Password	
	N	lanage Client List	

6. To add or update the license server keyfile, you can select any of the three methods.

ey File The key file will be checked out.	copied to the program data folder and the server will read it when there is no licenses	
Open Folder	C:\ProgramData\ICAM\Server\	
Browse		
003 in02ff72a0ecc 003 in02ff72a0ecc 003 in02ff72a0ecc 003 in02ff72a0ecc	ld 99 cer 250 p5 ld 99 cer 250 p5 ld 99 ab 250 n1 ld 99 ab 250 n1 ld 99 ac 250 n1 ld 99 ter 250 n1 ld 99 ter 250 n1	

- 1. Click the "browse..." button and select the saved text file from your desktop.
- 2. Alternatively, if updating an existing key file, you can use the "Open Folder..." button to open Windows explorer which will then have the "icamls.key" file selected. Then open it in notepad to paste your new license content inside.
- 3. Alternatively, if you check the 'Edit content' box, you can copy paste the license content between the Start of the keyfile Content until the End of the keyfile Content from the email into the provided area.

## ICAM V23 (Node-Locked)

## ICAM V23 and earlier (Floating)

- 1. Copy the license content from the email.
- 2. Open Windows Explorer (File explorer) and browse to the license server installation folder.
- 3. Usually: C:\Program Files\ICAM License Server V10\
- 4. If not already present, create a file named "icamflm.key"
- 5. Edit the file with notepad and paste the license content inside.
- 6. Save the file and the server will read it automatically.

## ICAMV22 and earlier (Node-Locked)

- 1. Copy the license content from the email.
- 2. Open Windows Explorer (File explorer) and browse to the ICAM client installation folder.
- 3. Usually: C:\Program Files\ICAM V22\
- 4. If not already present, create a file named "icam.key"
- 5. Edit the file with notepad and paste the license content inside.
- 6. Save the file.
